WE'RE MEETING EPA'S STANDARDS

For certified reference materials

Dr. Ehrenstorfer is proud to contribute to the UCMR 4 effort by developing standards that specifically meet the testing requirements of the program.

The Fourth Unregulated Contaminant Monitoring Rule (UCMR 4) requires the monitoring of 30 chemical contaminants between 2018 and 2020 using analytical methods developed by EPA and consensus organizations. This monitoring provides a basis for future regulatory actions to protect public health.

UCMR provides EPA and others with scientifically valid data on the occurrence of these contaminants in drinking water. The data gained from UCMR 4 testing will assist the EPA in developing regulations that will govern the allowable presence of these contaminants in drinking water.

Please let us know if you have questions or would like to discuss your specific requirements.

We are here to help.
